

# KEVIN HÖLSCHER

## Front-End Developer

Certified web developer, formerly working in the craft industry, looking to finally turn my hobby and great passion for coding into a career. I am experienced in working as a project manager with different teams and communicating with various clients to meet deadlines and achieve solutions. Looking for new challenges, I am always willing to learn and motivated to evolve in the fast-paced environment of web development.

## CODING EXPERIENCE & PROJECTS

### Weather App

HTML, CSS, React.js, Node.js

Development of a weather app through retrieval of multiple external API's and further processing of JSON objects, as well as securing the API keys through the backend Node.js ([project link](#)).

### Food Order App

HTML, CSS, React.js, Firebase

Development of an app for ordering food. In this project I was able to learn a lot about the concept of React, API's, databases and hooks in React and I was able to use different hooks like useContext, useEffect, useState, useRef and useReducer ([project link](#)).

### Slide Puzzle

HTML, CSS, React.js

Development of a 15-piece sliding puzzle using React with the goal of learning more about array manipulations. A particularly important approach here was "for loops" for checking the solvability of the puzzle ([project link](#)).

### RPG Game

HTML, Phaser3

Modular development of a mini-game including animation handling and processing of sound elements ([project link](#)).

## EDUCATION

### Professional training as a “Certified Webdeveloper” (ILS)

Institut für Lernsysteme GmbH, Hamburg (2019 - 2020)

Professional course with focus on frontend development with HTML, CSS and JavaScript - final grade: 1.0

Parts of the curriculum:

- Web design, design principles, web standards
- Planning of website development projects
- Web app development for mobile devices
- Server-side technologies for creating dynamic web pages (Node.js)

### Completion of secondary level 1

Friedensschule Wettringen - Ganztagschule (2006 - 2007)

Acquisition of the secondary school degree

## COURSES & CERTIFICATES

### Certificate “React - The Complete Guide (incl. Hooks, React, Router, Redux)”

Udemy Inc. (2022)

Practise-oriented online course to achieve qualification as a React.js Developer

Parts of the curriculum:

- Creating Custom Hooks
- Building a multi-page with React Router
- React State and Event Management
- Unit Testing of React Apps
- Handling of Side Effects

### Certificate “NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno)”

Udemy Inc. (2022)

Practise-oriented online course to achieve qualification as a Node.js Developer

Parts of the curriculum:

- Working with Express.js

• adding controllers/product models and fetching data from files via the model

• dynamic routes

• working with SQL
